

WELLNESS POLICY

Code No. 504.16

The board promotes healthy students by supporting wellness, good nutrition and regular physical activity as a part of the total learning environment. The school district supports a healthy environment where students learn and participate in positive dietary and lifestyle practices. By facilitating learning through the support and promotion of good nutrition and physical activity, schools contribute to the basic health status of students. Improved health optimizes student performance potential.

The school district provides a comprehensive learning environment for developing and practicing lifelong wellness behaviors. The entire school environment, not just the classroom, shall be aligned with healthy school district goals to positively influence a student's understanding, beliefs and habits as they relate to good nutrition and regular physical activity.

The school district supports and promotes proper dietary habits contributing to students' health status and academic performance. Foods available on school grounds and at school-sponsored activities during the instructional day should meet or exceed the school district nutrition standards. Foods should be served with consideration toward nutritional integrity, variety, appeal, taste, safety and packaging to ensure high-quality meals.

The school district will make every effort to eliminate any social stigma attached to, and prevent the overt identification of, students who are eligible for free and reduced-price meals. Toward this end, the school district may utilize electronic identification and payment systems; provide meals at no charge to all qualifying children, regardless of income; promote the availability of meals to all students.

The school district will develop a local wellness policy committee comprised of representatives of the board, parents, leaders in food/exercise authority and employees. The local wellness policy committee will develop a plan to implement and measure the local wellness policy and monitor the effectiveness of the policy. The committee will designate an individual to monitor implementation and evaluation the implementation of the policy. The committee will report annually to the superintendent/board regarding the effectiveness of this policy.

Specific Wellness Goals

Nutrition Education and Promotion (see Appendix A)

Physical Activity, (see Appendix B)

Other School-based Activities that are Designed to Promote Student Wellness, (see Appendix C)

Nutrition Guidelines for Foods Available on School Grounds (see Appendix D)

Implementation & Evaluation (see Appendix E)

Nutrition Education and Promotion

The school district will provide nutrition education and engage in nutrition promotion that:

- is offered at each grade level as part of a sequential, comprehensive, standards-based program designed to provide students with the knowledge and skills necessary to promote and protect their health;
- is part of not only health education classes, but also classroom instruction in subjects such as math, science, language arts, social sciences and elective subjects;
- promotes fruits, vegetables, whole-grain products, low-fat and fat-free dairy products, healthy food preparation methods and health-enhancing nutrition practices;
- emphasizes caloric balance between food intake and physical activity;
- links with meal programs, other foods and nutrition-related community services; and,
- includes training for teachers and other staff.

Physical Activity

Daily Physical Education The school district will provide physical education that:

- is for all students in grades K-12 for the entire school year;
- is taught by a certified physical education teacher;
- includes students with disabilities, students with special health-care needs may be provided in alternative educational settings;
- engages students in moderate to vigorous activity during at least 50 percent of physical education class time.

Daily Recess Elementary schools should provide recess for students that:

- is at least 20 minutes a day;
- is preferably outdoors;
- encourages moderate to vigorous physical activity verbally and through the provision of space and equipment;
- discourages extended periods of inactivity.

When activities, such as mandatory school-wide testing, make it necessary for students to remain indoors for long periods of time, schools should give students periodic breaks during which they are encouraged to stand and be moderately active. Physical Activity and Punishment Employees should not use physical activity (e.g., running laps, pushups) or consistently withhold opportunities for physical activity (e.g., recess, physical education) as punishment.

Other School-Based Activities that Promote Student Wellness

Integrating Physical Activity into Classroom Settings

- For students to receive the nationally recommended amount of daily physical activity and for students to fully embrace regular physical activity as a personal behavior, students need opportunities for physical activity beyond the physical education class. Toward that end, the school district will:
- offer classroom health education that complements physical education by reinforcing the knowledge and self-management skills needed to maintain a physically active lifestyle and to reduce time spent on sedentary activities;
- provide opportunities for physical activity to be incorporated into other subject lessons; and,
- encourage classroom teachers to provide short physical activity breaks between lessons or classes, as appropriate.

Communication with Parents

- The school district will support parents' efforts to provide a healthy diet and daily physical activity for their children. The school district will:
- encourage parents to pack healthy lunches and snacks and to refrain from including beverages and foods that do not meet the established nutrition standards for individual foods and beverages;
- provide parents a list of foods that meet the school district's snack standards and ideas for healthy celebrations/parties, rewards and fundraising activities;
- provide information about physical education opportunities during the school day; and
- support parents' efforts to provide their children with opportunities to be physically active outside of school.

Food Marketing in Schools

School-based marketing will be consistent with nutrition education and health promotion. The district will:

- limit food and beverage marketing to the promotion of foods and beverages that meet the nutrition standards for meals or for foods and beverages sold individually;
- discourage school-based marketing of brands promoting predominantly low-nutrition foods and beverages; and
- promote healthy foods, including fruits, vegetables, whole grains, and low-fat dairy products

Nutrition Guidelines for All Foods Available on School Grounds

School Meals

Meals served through the National School Lunch and Breakfast Programs will:

- be appealing and attractive to children;
- be served in clean and pleasant settings;
- meet, at a minimum, nutrition requirements established by local, state and federal law;
- offer a variety of fruits and vegetables; and
- serve only low-fat (2%) and fat-free milk and nutritionally equivalent non-dairy alternatives (as defined by the USDA).

Breakfast

To ensure that all children have breakfast, either at home or at school, in order to meet their nutritional needs and enhance their ability to learn, schools will:

- operate the breakfast program, to the extent possible;
- arrange bus schedules and utilize methods to serve breakfasts that encourage participation,
- notify parents and students of the availability of the School Breakfast Program, where available; and,
- encourage parents to provide a healthy breakfast for their children through newsletter articles, take-home materials or other means.

Free and Reduced-Priced Meals

The school district will make every effort to eliminate any social stigma attached to, and prevent the overt identification of, students who are eligible for free and reduced-price meals. Toward this end, the school district may:

- utilize electronic identification and payment systems;
- provide meals at no charge to all qualifying children, regardless of income; and,
- promote the availability of meals to all students.

Meal Times and Scheduling

The school district:

- should schedule meal periods at appropriate times, e.g., lunch should be scheduled between 11 a.m. and 1 p.m.; should not schedule tutoring, club or organizational meetings or activities during mealtimes, unless students may eat during such activities;
- will provide students access to hand washing or hand sanitizing before they eat meals or snacks; and,
- should take reasonable steps to accommodate the tooth-brushing regimens of students with special oral health needs (e.g., orthodontia or high tooth decay risk).
- **Sharing of Foods** The school district discourages students from sharing their foods or beverages with one another during meal or snack times, given concerns about allergies and other restrictions on some children's diets. **Foods Sold Outside the Meal** (e.g. vending, sales)
- Secondary schools: In junior high and high schools, all foods and beverages sold individually outside the reimbursable meal programs (including those sold through a la carte, vending machines, and student stores) during the school day will meet the following nutrition standards:

Beverages

The school district will work with distributors in providing: water or seltzer water without added caloric sweeteners; fruit and vegetable juices and fruit-based drinks that contain at least 50 percent fruit juice and that do not contain additional caloric sweeteners; low-fat or fat-free milk and nutritionally equivalent nondairy beverages (as defined by the USDA).

Foods

A food item sold individually will make a positive contribution to a child's diet and health.

Snacks

The school will encourage snacks that will make a positive contribution to children's diets and health, with an emphasis on serving fruits and vegetables as the primary snacks and water as the primary beverage. The school district will provide a list of healthful snack suggestions to teachers and parents.

Celebrations Classroom celebrations will be limited to no more than one per month. The school district will provide a list of healthy party suggestions to teachers and parents.

Food Safety All foods made available on campus adhere to food safety and security guidelines. All foods made available on campus comply with the state and local food safety and sanitation regulations. Hazard Analysis and Critical Control Points (HACCP) plans and guidelines are implemented to prevent food illness in schools. For the safety and security of the food and facility, access to the food service operations are limited to authorized personnel.

Appendix E

Plan for Measuring Implementation

Monitoring The superintendent will ensure compliance with established school district-wide nutrition and physical activity wellness policies.

In the district:

- the principals will ensure compliance with those policies in the school and will report on the school's compliance to the superintendent; and,
- food service staff, at the school or school district level, will ensure compliance with nutrition policies within food service areas and will report on this matter to the superintendent or principal.
- the school district will report on the most recent USDA School Meals Initiative (SMI) review findings and any resulting changes. If the school district has not received a SMI review from the state agency within the past five years, the school district will request from the state agency that a SMI review be scheduled as soon as possible;
- the superintendent will develop a summary report every three years on school district-wide compliance with the school district's established nutrition and physical activity wellness policies, based on input from schools within the school district; and,
- the report will be provided to the school board and also distributed to all school wellness committees, parent/teacher organizations, school nurse and principals in the school district.

Policy Review

To help with the initial development of the school district's wellness policies, each school in the school district will conduct a baseline assessment of the school's existing nutrition and physical activity environments and practices. The results of these assessments will be compiled to identify and prioritize needs.

Assessments will be repeated every 3 years to help review policy compliance, assess progress and determine areas in need of improvement. As part of that review, the school district will review the nutrition and physical activity policies and practices and the provision of an environment that supports healthy eating and physical activity. The school district will revise the wellness policies and develop work plans to facilitate their implementation.
